# VDO Fleet Services:

## Full compliance, maximum efficiency – your fleet in safe hands

VDO Fleet makes your life easier with a comprehensive range of fleet management services. Data management, archiving, scheduling, working times, obligations and financial risks at your fingertips – all within a single tool that offers services to suit your needs. Exceptionally user-friendly: a single log-in for all features – simple and self-explanatory.

### Lawful data handling ensured

- Tachograph and driver card data is downloaded on time and stored/deleted in a compliant way.

### Easier to meet information obligations

- VDO Fleet assists you with the regular briefings and documentation between you and your drivers.

### Real-time summary of breaches

- Complete transparency for current breaches within the fleet, prevention of ERRU limits being exceeded, integration of national working time regulations.

### Control over financial risks

- Quantify and avert potential fines and security deposits at all times.

### Compliant management of international journeys

- VDO Fleet supports observance of the new EU regulations contained in EU Mobility Package I in cross-border transport.

### Real-time transparency for your fleet

- Vehicle location and lane, including information on remaining driving times, for more efficient weekly and shift planning.

**VDO**

## VDO Fleet Tachograph Management

With VDO Fleet Tachograph Management, you not only meet legal requirements hassle-free, but will also be optimising your overall fleet management. Let the system do the work, allowing you to concentrate on what really matters – seamless operation of your fleet.

### Resource optimisation and decision-making

- Hassle-free management of locations and groups.
- Straightforward comparison function (e.g. for fines) to improve decision-making.

### Personnel planning made easy

- Get detailed information on remaining driving time.
- The dashboard automatically reports driver problems for customised training.

### Data archiving and provision

- Checks of completeness and accuracy for mandatory modules and certificates.
- Data provided to official bodies in the requested format, including for on-site checks.
- Secure cloud-based storage enables straightforward data retrieval.

### Managing cross-border journeys

- Meets the requirements of EU Mobility Package I with automatic logging of country of origin and destination.

## VDO Fleet Remote Download

Our Remote Download solution offers much more than just downloads of tachograph and driver card data. Make switching between systems a thing of the past and ensure hassle-free legal compliance. Straightforward management of locations and groups, without the need for a complex IT infrastructure. Can be adapted to the specific requirements of your fleet.

### Increased efficiency

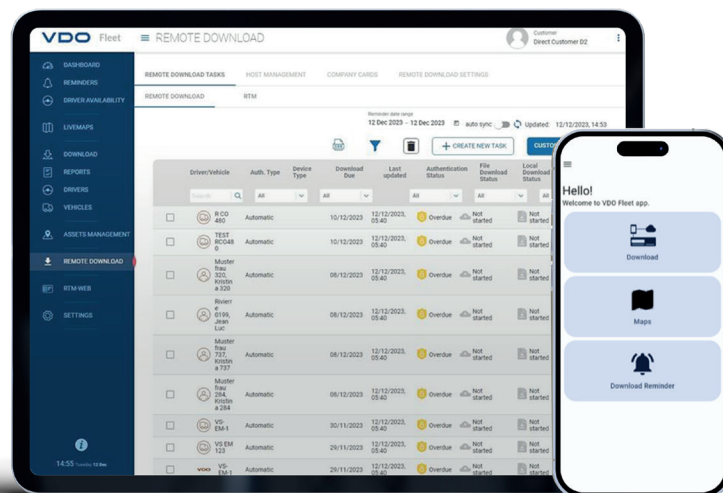

- Save time by automating manual downloads.
- Use the reminder function to gain an improved overview and ensure compliance with regulations and download requirements, e.g. on a weekly basis.

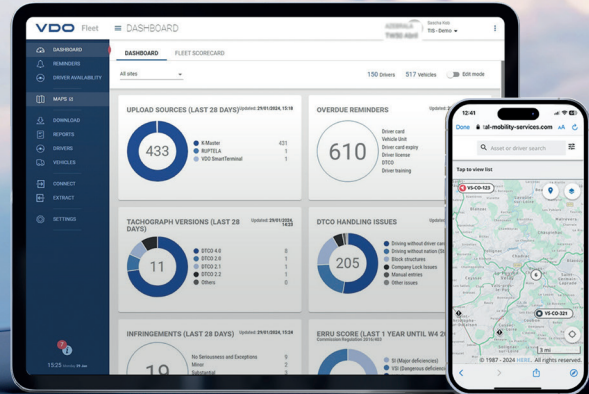

### Compliance and reliability

- Ensures timely replacement of company cards thanks to overview lists with expiry dates.
- Company card hosting for seamless downloads, including for night journeys, and permanent data access.

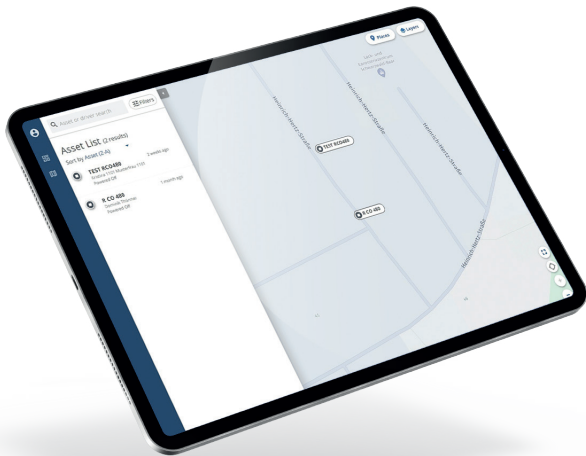

## VDO Fleet Live Services

These services give you almost real-time access to your fleet. Maximise your efficiency, spot delays at an early stage and immediately check your drivers' remaining driving times – and accept new orders in a flexible manner. Take advantage of this real-time fleet solution to take your company to the next level.

VDO Fleet Maps facilitates real-time scheduling and monitoring of your vehicles and drivers. Keep track of driver availability at all times and follow the exact location and current direction of your vehicles. Access precise location details and check your drivers' remaining driving times.

VDO Fleet Maps

**User-friendly track-and-trace system**

- Easy to use.
- Mobile map view also supported by smartphones (VDO Fleet App).
- All assets shown in almost real time.
- A follow-asset function allows you to keep the vehicle in the centre of the map for targeted vehicle monitoring.

**Precise locational information**

- The exact mileage and remaining driving time are displayed.
- Simplified planning of driver availability.
- Outstanding transparency as to whether the journey can be carried out on time and in compliance with the law.

**Reduce costs**

- Avoid unnecessary fuel consumption thanks to a summary of engine idling.
- Optimum billing of the driver's mileage on delivery of goods.

**VDO Fleet Driver Availability**

Easily-to-read and customizable information on the availability of all drivers is accessible on a detailed page within VDO Fleet. This facilitates efficient and compliant planning of the drivers' week. Furthermore, VDO Fleet Maps allows maximizing productivity for each day.

**Exceptional transparency**

- On the basis of downloaded data or in real time, VDO Fleet displays driver availability for your fleet in a clearly structured menu.
- Keep track of remaining driving times, breaks and compensatory periods.
- Avoid arguments with your drivers about fines for driving time infringements.

The screenshot displays the 'DRIVER AVAILABILITY' section of the VDO Fleet Services dashboard. The interface includes a sidebar with navigation options like Dashboard, Reminders, Maps, Downloads, Reports, Drivers, Vehicles, Assets Management, Remote Download, and Settings. The main content area features a table with columns for Driver name, Data Timestamp, Last known activity, Start of next daily rest, Start of next shift, Remaining daily driving time, Allowed reductions to daily driving, Allowed reductions to daily rest, Type of Daily Rest, Duration of next daily rest period, End of current week, and Start of next week. The table lists 12 drivers with their respective activity status (Driving, Work, Available) and rest periods.

Driver name	Data Timestamp	Last known activity	Start of next daily rest	Start of next shift	Remaining daily driving time	Allowed reductions to daily driving	Allowed reductions to daily rest	Type of Daily Rest	Duration of next daily rest period	End of current week	Start of next week

VDO Fleet Driver Availability

### Plan drivers in a compliant way

- Simplified personnel planning with clear facts about driver availability.
- Route plans to ensure observance of driving and rest periods.
- Use real-time data to respond proactively to potential delays or breaches instead of playing catch-up.
- Avoid fines thanks to observance of driving and rest periods.

### VDO Fleet Partner Solutions

Intelligent interfaces make VDO Fleet Services suitable for mixed fleets and systems without harmonised software. With VDO Fleet Connect and VDO Fleet Extract, data from third-party systems can be easily imported, processed and exported for all VDO Fleet Services.

### Intelligent interfaces

- Import, process and export data sets seamlessly from third-party systems for all VDO Fleet Services.

### Add value

- Use our tachograph management solution in combination with your existing fleet telematics system.
- Migrate tachograph data to VDO Fleet Services via your server or fleet management system.
- Ideal for fleet management providers who aim to generate added value using DTCO data.

### The data solutions of tomorrow

- Fleet managers authorise third-party providers to integrate driver/vehicle data within their software solutions, e.g. billing or payroll systems.

VDO Fleet App

## VDO Fleet App

Take control of your fleet like never before – download the VDO Fleet App and perform all the tasks of a fleet manager from the comfort of your smartphone. Keep an eye on the current status of your fleet, even when you are on the go.

### Mobile experience

- Connect the DLK Smart Download Key with your smartphone via Bluetooth.
- Download the tachograph and driver card data required by law from DLK Smart and securely archive this data in VDO Fleet.
- Access VDO Fleet via our app and stay up to date on your mobile device thanks to key reminders, such as the next download deadline.
- Real-time monitoring of your fleet and drivers thanks to integration of VDO Fleet Maps and Driver Availability.
- Respond immediately to potential incidents/delays and take action.
